

## The Most Comfortable B-Van Ever Created

Inspired by German explorer and naturalist Alexander von Humboldt, the Winnebago® Boldt™ was developed for four-season adventure. The product of everything we've learned as the industry's leading B-Van builder, the Boldt is ready for you to make it your own. Extensive use of RAM® Tough-Track™ mounts lets you position electronics, accessories, even tables right where you want them. And with extensive automotive-grade insulation, heated holding tanks and many more

all-weather upgrades, your Boldt will prove a quiet and comfortable haven wherever and whenever you roam. The Boldt couples the safety features, power and fuel-efficiency of the new Mercedes-Benz® Sprinter chassis with the freedom and reliability of our Best-in-Class Pure<sup>3</sup> Advanced Energy System. Together with our coach-building expertise, the result is a groundbreaking van that drives, camps and lives like no other: the Winnebago Boldt.

Fuel Capacity (gal.)	24.5	24.5

<sup>A</sup> Standard Chassis    <sup>B</sup> Optional 4WD Chassis

- The height of each model is measured to the top of the tallest standard feature and is based on the curb weight of a typically equipped unit. The actual height of your vehicle may vary by several inches depending on chassis or equipment variations. Please contact your dealer for further information.
- Floorplans feature a wide-body design - over 96". In making your purchase decision, you should be aware that some states restrict access on some or all state roads to 96" in body width. Before making your purchase decision, you should confirm the road usage laws in the states of interest to you.
- The load capacity of your motorhome is designated by weight, not by volume, so you cannot necessarily use all available space when loading your motorhome.
- Capacities are based on measurements prior to tank installation. Slight capacity variations can result due to installation applications.
- Capacities shown are tank manufacturer's listed water capacity (W.C.). Actual filled LP capacity is 80% of listing due to overfilling prevention device on tank.
- Actual towing capacity is dependent on your particular loading and towing circumstances which includes the GVWR, GAWR, and GCWR, as well as adequate trailer brakes. Please refer to the Operator's Manual of your vehicle for further towing information.
